Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

Concentrating on the ways to treat the surety within the framework of the Bankruptcy Code, this book examines the surety's position as the man-in-the-middle between the obligee and the principal, and between the claimants and the principal.

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

The authors apply their extensive experience teaching and administering bankruptcy law in this casebook for students. They cover the basics of consumer and business bankruptcy law and give added treatment to the practical application and consequences of the law. The authors provide students with realistic problems and use the resources of The West Education Network (TWEN) to integrate the new bankruptcy law, set to take effect October 2005, for further online study. The TWEN site will provide new text and problems that incorporate the new bankruptcy law.

Tax Planning for Troubled Corporations, by noted tax attorneys Gordon D. Henderson and Stuart J. Goldring, clearly outlines the steps involved in corporate bankruptcy proceedings and examines the tax procedural aspects of bankruptcy.
