"Teaching Modern Foreign Languages in the Primary School" supports student and practising teachers - whether generalist or specialist - to have the confidence and skills to successfully incorporate modern foreign languages into teaching. Based on the author's extensive experience of both teaching across Key Stage 1 and Key Stage 2 and delivering initial teacher education, this book provides

comprehensive guidance on the essential theory and pedagogy that underpins language teaching, together with strategies and tools that can be easily implemented in the classroom. This title covers e. Current Trends in the Development and Teaching of the four Language Skills builds connections from theory in the four language skills to instructional practices. It comprises twenty-one chapters that are grouped in five sections. The first section includes an introductory chapter which presents a communicative competence framework developed by the editors in order to highlight the key role the four skills play in language learning and teaching. The next four sections each represent a language skill: Section II is devoted to listening, Section III to speaking, Section IV to reading and Section V to writing. In order to provide an extensive treatment of each of the four skills, each section starts with a theoretical chapter which briefly illustrates advances in the understanding of how each skill is likely to be learned and taught, followed by four didactically oriented chapters authored by leading international specialists. These pedagogical chapters deal specifically with four key topics: 1) areas of research that influence the teaching of a particular skill; 2) an overview of strategies or techniques necessary for developing a particular skill; 3) an approach to the academic orientation of a particular skill, and 4) unique aspects of teaching each skill. Moreover, all chapters incorporate two common sections: pre-reading questions at the beginning of the chapter in order to stimulate readers' interest in its content, and a section entitled suggested activities at the end of the chapter in order to allow readers put the ideas and concepts presented into practice. The accessible style and practical focus of the volume make it an ideal tool for teachers, teacher trainers, and teacher trainees who are involved in teaching the four language skills in a second or foreign language context.

As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing. Second Language Listening combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing. Second Language Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.

Language teachers present theories for sharpening students' communication skills in a second language, and describe examples of their application in actual classrooms. They explain strategies for beginning listening comprehension; interaction skills with idiomatic expressions, integrating social skills, and group work at intermediate levels; and refining literacy skills for advanced students. Provides a springboard of ideas and approaches for teachers and administrators to tailor to their specific needs. Annotation copyright by Book News, Inc., Portland, OR

Early literacy instruction typically emphasizes foundational skills--often at the expense of engaging young children in reading and supporting their comprehension of different types of texts. This book explains the essential elements of comprehension and shares a wealth of classroom-tested instructional practices. It presents developmentally informed strategies for scaffolding comprehension skills, using content to promote engagement, and implementing high-level discussions and writing tasks. Ways to teach and assess English learners and other diverse students are highlighted throughout. The book features explicit links to the Common Core State Standards (CCSS) as well as helpful reproducible forms. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size.

This new edition surveys the major approaches and methods in language teaching.

This reader-friendly text, firmly grounded in listening theories and supported by recent research findings, offers a comprehensive treatment of concepts and knowledge related to teaching second language (L2) listening, with a particular emphasis on metacognition. The metacognitive approach, aimed at developing learner listening in a holistic manner, is unique and groundbreaking. The book is focused on the language learner throughout; all theoretical perspectives, research insights, and pedagogical principles in the book are presented and discussed in relation to the learner. The pedagogical model? a combination of the tried-and-tested sequence of listening lessons and activities that show learners how to activate processes of skilled listeners ? provides teachers with a sound framework for students' L2 listening development to take place inside and outside the classroom. The text includes many practical ideas for listening tasks that have been used successfully in various language learning contexts.

With the widespread interest in digital entertainment and the advances in the technologies of computer graphics, multimedia and virtual reality technologies, the new area of "Edutainment" has been accepted as a union of education and computer entertainment. Edutainment is recognized as an effective way of learning through a medium, such as a computer, software, games or AR/VR applications, that both educates and entertains. The Edutainment conference series was established and followed as a special event for the new interests in e-learning and digital entertainment. The main purpose of Edutainment conferences is the discussion, presentation, and information exchange of scientific and technological developments in the new community. The Edutainment conference series is a very interesting opportunity for researchers, engineers, and graduate students who wish to communicate at these international annual events. The conference series includes plenary invited talks, workshops, tutorials, paper presentation tracks, and panel discussions. The Edutainment conference series was initiated in Hangzhou, China in 2006. Following the success of the first (Edutainment 2006 in Hangzhou, China), the second (Edutainment 2007 in Hong Kong, China), and the third events (Edutainment 2008 in Nanjing, China), Edutainment 2009 was held August 9–11, 2009 in Banff, Canada. This year, we received 116 submissions from 25 different countries and regions - cluding Austria, Canada, China, Denmark, Finland, France, Germany, Greece, Hong Kong, Italy, Japan, Korea, Malaysia, Mexico, The Netherlands, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, Taiwan, Trinidad and Tobago, UK, and USA.

This book presents a pioneering longitudinal study on English language instruction at the elementary school (ELES) level in the Japanese public school system. It attempts to identify those domains most sensitive to early English instruction by employing a state-of-the-art quantitative research methodology. English education was formally introduced in Japan for fifth and sixth graders in 2011 and is still in its infancy as a program. This study compares two groups (Grade 7 and 8) of students, one with ELES and one without, in order to shed light on their experiences. Comparisons are carried out not only quantitatively, measuring changes in English skills (listening, speaking, reading, and vocabulary / grammar) and the ELES students' affective aspects, but also qualitatively through in-depth interviews. Thus, this study attempts to capture the ELES students' experiences from a multi-dimensional perspective. The comprehensive literature review provided offers a valuable resource not only for researchers looking for a quick digest of the literature in this field before undertaking their own research, but also for policy-makers seeking to assess how to best implement ELES.

There can arguably be no greater influence on a person's life than their education, and it is the classroom practice of teachers that helps to shape young lives. How to Develop the Habits of Outstanding Teaching aims to help teachers improve their teaching habits and practice so that every student can be supported, challenged and inspired to achieve their ambitions and goals. Providing a step-by-step guide to the key components for creating outstanding lessons, the book includes a wealth of strategies and techniques that are easy to implement and will have an immediate impact on your teaching and students. With a wide range of examples and case studies taken from different subjects, the book covers all aspects of teaching including: how to create independence, resilience and creativity; tried and test techniques for differentiation and questioning; habits and hacks to manage your time effectively; ideas on how you can coach yourself to 'outstanding'; Memory techniques for students; literacy in lessons; marking and homework. Ideal for newly qualified teachers, as well as more experienced teachers who are looking for some fresh ideas for their lessons, this highly practical resource will instil the habits that will enable you to perform at an outstanding level consistently in the classroom.

There are many assessment systems available to provide the answers teachers and parents seek regarding the progression of infants, toddlers, and young children. However, simply choosing and administering an assessment instrument or procedure from the wide array of tools available today can be an overwhelming task. Assessment of Young Children with Special Needs helps prepare teachers for the task of evaluating the skills of infants, toddlers, and preschool children with developmental delays and those considered at risk to...

The age for early language learning has dropped dramatically in the past decade to include children under 6 years old, yet very little published research exists to support the implementation of such programmes. Drawing on a synthesis of theory, research and practice, this edited volume makes an innovative contribution to literature concerning language education for very young children. It explores language learning in a wide range of geographical contexts with reference to second and foreign language learning, bilingualism and plurilingualism with children under the age of 6 years old. Chapters present discussion around teacher education, policy-making, international case studies, school and home-based projects, code switching and language use, and methodologies and approaches. Early Years Second Language Education: International perspectives on theory and practice will be essential reading for researchers, academics, teacher trainers, and post-graduate students in the fields of early years education, foreign and second language education, language didactics and teacher education.

Getting children to listen is a challenge for even the most seasoned professional. We prepare children for painting by dressing them in a painting smock. How do we prepare children for listening? Active Listening, Second Edition is a fully updated and revised edition of the popular 3-level listening series for adult and young-adult learners of North American English. Each level offers students 16 engaging, task-based units, each built around a topic, function or grammatical theme. Grounded in the theory that learners are more successful listeners when they activate their prior knowledge of a topic, the series gives students a frame of reference to make predictions about what they will hear. Through a careful balance of activities, students learn to listen for main ideas, to listen for details, and to listen and make inferences. Active Listening, Second Edition is intended for high-beginning to intermediate students. It can be used as a main text for listening classes or as a component in speaking or integrated skills classes. Features of the Student's Book - A before-you-begin unit to develop awareness of listening strategies - Updated prelistening schema-building activities to build vocabulary - New listen-again activities for additional coverage of listening skills - Optional your-turn-to-talk pages that offer speaking and pronunciation practice - New culturally rich Expansion units that include authentic student interviews - A new self-study listening section with audio CD for additional practice Features of the Teacher's Manual - Step-by-step teaching notes with key words highlighted - A wealth of optional speaking activities and listening strategies - Suggested times for completing lessons - Photocopiable unit quizzes - Two complete tests with audio CD -

Contains transcripts and answer keys for all the student exercises and the recorded conversations and passages presented in Developing listening skills 1, the first volume of the three-volume listening course set designed for intermediate or higher-level English language students, with content and difficulty appropriate for high school and university students.

Using a framework based on principles of teaching and learning, this guide for teachers and teacher trainees provides a wealth of suggestions for helping learners at all levels of proficiency develop their listening and speaking skills and fluency. By following these suggestions, which are organized around four strands – meaning-focused input, meaning-focused output, language-focused learning, and fluency development – teachers will be able to design and present a balanced program for their students. Teaching ESL/EFL Listening and Speaking, and its companion text, Teaching ESL/EFL Reading and Writing, are similar in format and the kinds of topics covered, but do not need to be used together. Drawing on research and theory in applied linguistics, their focus is strongly hands-on, featuring easily applied principles, a large number of useful teaching techniques, and guidelines for testing and monitoring. All Certificate, Diploma, Masters and Doctoral courses for teachers of English as a second or foreign language include a teaching methods component. The texts are designed for and have been field tested in such programs.

Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.
