Most introductory books about computers are long, detailed technical books such as those used in a computer science course or else tutorials that provide instructions on how to operate a computer with little description of what happens inside the machine. This book fits in the large gap between these two extremes. It is for people who would like to understand how computers work, without having to learn a lot of technical details. Only the most important things about computers are covered. There is no math except some simple arithmetic. The only prerequisite is knowing how to use a web browser. As an alternative or adjunct to reading the book, you can watch a series of short videos by going to youtube.com and searching for "Understanding Computers, Smartphones and the Internet". Only current day technology is covered. People who are interested in learning about how computers evolved from the earliest machines can read the companion book "A Concise History of Computers, Smartphones and the Internet". While originally intended for people who are not in the computer field, this book is also useful for those taking a coding course or an introductory computer science course. Even people already in the computer field will find things of interest in this book.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

I've fallen victim to a heinous act. An act so vile, so downright dirty, that I'm not sure as a twenty-year-old man I'll ever recover. Brace yourself, because what I'm about to tell you might have you gasping in secondhand horror.Ready? Here it goes . . .I've recently become the pawn of a meddling mom.Yes . . . A MEDDLING MOM--who's been trying to set me up all summer.Now, I understand it's not a crime for a mother to want her child to fall in love, but when she makes it her relentless MISSION, the heinous act should be classified as a misdemeanor at least.Of course, my mom, the evil matriarch in the devil's leggings, made her final stab at finding a girl for me days before I went back to college.And I hate to admit it, but she saved a doozy for last. A titan in black skinny jeans. A boss of nonchalance. And a girl who would not only turn my life upside down, but do it while juggling a soccer ball, looking effortlessly gorgeous around campus, and is one hundred percent against relationships. Of any sort. Thanks, Mom.

The World Food Summit, held in Rome in November 1996, recognised the urgent need for better information. As a result the FIVIMS (Food Insecurity and Vulnerability Information and Mapping System) initiative was launched, as a co-

operative venture, to assist countries and the international community to identify the "who, where and why" of food insecurity. Even before the Summit, many countries had established approaches for this purpose based on multidisciplinary networks, at national and local levels. One of these approaches, developed first in French-speaking Africa, is the FSIEWS method (Food Security Information and Early Warning System) proposed in this handbook as one of the tools available to those engaged in the fight against hunger. This contribution to the FIVIMS initiative is addressed to the national technical officers at central and decentralised level, as well as to their collaborators from the technical assistance community.

In this witty and heartfelt rom-com debut for fans of Jasmine Guillory, Emily Henry, and Tessa Bailey, an Indian American woman signs herself and her boyfriend up for a matchmaking site to prove they're a perfect match, only to be paired with her ex instead. High school sweethearts Rita Chitniss and Milan Rao were the golden couple, until the day he broke her heart. Now, six years later, Rita has turned her passion for furniture restoration into a career and has an almost-perfect boyfriend, Neil. The last thing she needs is for Milan to re-enter her life, but that's exactly what happens when her mother, an unfailing believer in second chances, sets them up. Milan is just as charming, cocky, and confident as he was back in school. Only this time, he actually needs her business expertise, not her heart, to flip a hard-to-sell house for his realty agency. While Rita begrudgingly agrees to help, she's not taking any risks. To prove she's definitely over him, she signs herself and Neil up on MyShaadi.com, a Desi matchmaking site famous for its success stories and trustworthy enough to convince everyone that she and Neil are the new and improved couple. Instead, she's shocked when MyShaadi's perfect match for her isn't Neil...it's Milan. Ignoring the website and her mother is one thing, but ignoring Milan proves much more difficult, especially when she promises to help him renovate the beach house of her dreams. And as the two of them dive deeper into work—and their pasts—Rita begins to wonder if maybe her match wasn't so wrong after all....

The first day she was sitting by herself - I felt sorry for her. After all, it couldn't be easy wrangling all the testosterone at Wingmen Inc as one of the only female office managers. The second day she literally counted her carrots during break - she had seven by the way, right along with seven sips of her drink in between taking seven tiny little bites of the first carrot. Now I'm not one to brag, or maybe I am, but math and science fascinate me, so do problems. And this woman screamed puzzle from the way she ducked her head every time anyone looked at her, to the way she counted food and tapped the table when she didn't think anyone was watching. I'd like to think I took pity on her that day when, in fact, she was the one that took pity on me and asked if I needed a friend. She assumed I had a learning disability since I'd been staring so damn hard. Things would have ended there, except, my bosses need someone to test the new Wingmen App and since I was the only single guy on the floor - I was nominated, right along with the only single woman, the same one who thinks I need to use my fingers to count. Apparently rumors of my sexcapades throughout college reached even her ears, because she wants nothing to do with me, which makes beta testing a bitch. I have thirty days to win her over and prove myself to my bosses. One thing's for certain, I'm going to have to buy a hell of a lot of carrots.

The pitch went like this: Chris Butler, a retired cop, ran a private investigator firm in Concord, California. His business had a fascinating angle—his firm was staffed entirely by soccer moms. In fact, Butler employed PI Super Moms: attractive, organized, smart, and trained in investigative techniques, self-defense, and weaponry. This American Life host Ira Glass described them as "MILF: Charlie's Angels." When this story came across Pete Crooks's desk when he was working at Diablo magazine in 2010, he was instantly hooked. He'd heard a little bit about Butler and his super moms in the news; they'd been featured in People magazine and on Dr. Phil. What Butler's publicist was offering was too tantalizing to pass up: an opportunity to ride along with Butler and a few of his sexy PIs as they prepared to start filming a reality TV show. But after the ride-along—and after he started receiving mysterious emails from one of Butler's employees—Crooks started to realize something didn't seem right. After doing a little digging, he discovered the "sting" he'd seen only had one real victim…him. The PI bust had been a setup. Crooks wasn't a hardboiled crime reporter. He did lifestyle pieces for a regional magazine. The more he learned about Butler's operation, the more he realized he was in far over his head. But swallowing his fears, he decided he was going to write an expose on Butler and his entire organization. He soon found himself deep in the underbelly of fake sting operations, wannabe celebrities, police corruption, drug-dealing, reality television, double-crossing employees, and more twists and turns than a dozen crime thrillers.
