

Who's Who of Canadian Women is a guide to the most powerful and innovative women in Canada. Celebrating the talents and achievement of over 3,700 women, Who's Who of Canadian Women includes women from all over Canada, in all fields, including agriculture, academia, law, business, politics, journalism, religion, sports and entertainment. Each biography includes such information as personal data, education, career history, current employment, affiliations, interests and honours. A special comment section reveals personal thoughts, goals, and achievements of the profiled individual. Entries are indexed by employment or affiliation for easy reference. Published every two years, Who's Who of Canadian Women selects its biographees on merit alone. This collection is an essential resource for all those interested in the achievements of Canadian women.

Ô This is a thought-provoking book with relevance to a broad readership, especially IP practitioners with a strong international focus. Õ Æ Australian Intellectual Property Law Bulletin Intellectual property (IP) has gained an unprecedented importance in the new world of globalization and the knowledge economy. However, experience, as well as cyclical attitudes toward IP, show that there is no universal model of IP protection. This comprehensive book considers new and emerging IP issues from a development perspective, examining recent trends and developments in this area. Presenting an overview of the IP landscape in general, the contributing authors subsequently narrow their focus, providing wide-ranging case studies from countries across Africa, Asia and Latin America on topical issues in the current IP discourse. These include the impact of IP on the pharmaceutical sector, the protection of life forms and traditional knowledge, geographical indications, access to knowledge and public research institutes, and the role of competition policy. The challenges developing countries face in the TRIPS-Plus world are also explored in detail. The diverse range of contributions to this thought-provoking book offer a wide variety of alternative perspectives on and solutions for the controversial issues surrounding the role of IP within sustainable development. As such, it will prove a stimulating read for government policy-makers, trade negotiators, academics, lawyers and IP practitioners in general, UN and other intergovernmental agencies, development campaigners and aid agencies, environmentalist groups and university students. The expanded and improved second edition includes 200 pages of new material and enhanced CD content. New in-text exam objectives highlight important sections for readers. The CD-ROM contains a sample test program.

6+ Hours of Video Instruction Learn the fundamentals of databases. Overview In MTA 98-364 Database Fundamentals LiveLessons , you gain the knowledge required to work with and design relational databases and prepare for Microsoft MTA Exam 98-364. Drawing on his experience as a SQL Server MVP, Eric Johnson guides you from the basic elements of databases, such as tables and indexes, and progresses into the principles of database design and layout. Building on that foundation, you learn how to perform more advanced skills, such as database administration, backup, and security. Topics are organized into easily digestible lessons so you can learn these skills with ease. This video course, along with additional study,

provide a pathway for future success in technology courses and careers. The MTA program curriculum helps instructors teach and validate fundamental technology knowledge and provides students with a foundation for their careers as well as the confidence they need to succeed in advanced studies. Through the use of MOAC MTA titles you can help ensure your students future success in and out of the classroom. Database Administration Fundamentals covers introductory knowledge and skills including: relational databases; core database concepts; relational database concepts; security requirements for databases and the data stored in them; database objects -- such as tables and views; graphical tools and T-SQL scripts; database queries; and stored procedures.

> The Microsoft Technology Associate MTA certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist MCTS or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP or MCPD certifications. The certification focuses more on knowledge and a little less on skills. However, the knowledge areas are all based on MS products so you must know those products inside and out. Questions on the general knowledge are relatively easy. Product and technology specific technical questions, however, are way more difficult. This is why we developed this study product - we focus on those difficult topics that involve difficult technical skills. We want you to be able to answer these difficult questions and secure exam success accordingly. Exam 98-364: Database Fundamentals is designed to allow candidates to assess their knowledge of and skills with SQL Server databases and operations. Topics covered include: Understanding Core Database Concepts Creating Database Objects Manipulating Data Understanding Data Storage Administering a Database
