questions have been divided into a set of over 600 review questions designed to help master key exam topics and four full-length multiple-choice tests that simulate the NCE.

Michelle Phillips' Q&A study guides, first published in 1994, have helped thousands of massage therapists pass their licensing and certification exams with a simple, direct approach involving a comprehensive list of multiple choice questions and answers in an easy-to-use format. This new, single volume study guide from Massage Review Publications is a major update and expansion with hundreds of new questions. Completely reorganized, containing nearly 3000 questions with answers, it is also available in Spanish. The reorganization focuses directly on the MBLEx exam, with content chapters matching the outline provided by the FSMTB. This study guide will take you from Anatomy & Physiology and Kinesiology right through to Guidelines for Professional Practice in the same order as those subjects appear on the MBLEx content outline. Not designed to be a textbook, or a review with extensive commentary and explanations, this book assumes that you have had exposure to the material in school and want to do a comprehensive review of the subject matter areas and properly prepare yourself to pass the exam. It will provide you with a targeted, well-organized series of practice exams containing multiple choice

questions similar to those found on your actual exam. The book is specifically designed to assist you in determining your strengths and weaknesses in each subject area so that you can concentrate your study in the areas most needed. Those taking either of the NCBTMB exams will also find this study guide invaluable and we have retained our chapter on Eastern Bodywork for that reason. Unlike other reviews, the answers are found on the same page as the questions so you do not have to flip to the back of the book or go online to find the correct answers. This instant feedback facilitates learning and retention of what has been learned, as well as saving time and frustration. Studying in this manner will make you increasingly comfortable with the examination format and more confident in your ability to navigate through the exam to a successful conclusion.

Milady's Theory and Practice of Therapeutic Massage Workbook is a hard-working companion to Milady's Theory and Practice of Therapeutic Massage . In it you'll find questions based on each chapter in the text, written as fill-ins, matching columns, and word review. Illustrations from the text are reproduced for students to identify and label correctly. Multiple-choice questions stimulate the format found on state licensing exams. All the material in the workbook is suitable for teachers to use for testing student comprehension, and the

Based on a philosophy of active learning, this innovative and refreshing study aid is designed to help students learn the fundamentals of maternal-child nursing through unfolding case studies. Nursing content is woven into vivid case vignettes that evolve over time, thus engaging students and helping them develop critical thinking and clinical decision-making skills. The text also serves as a comprehensive workbook for students preparing for the NCLEX-RN®. It is the only maternal-child nursing review text to integrate content with practice and professional responsibilities to foster an engrossing real-world learning experience. The case vignettes are based on actual cases and incorporate all core content topics (assessment, planning, intervention, and evaluation of patient care) for maternal-child nursing and NCLEX-RN® success. The book includes multiple choice, matching, true/false and calculation questions, each related to the unfolding clinical situation. Exercise answers with rationale appear at the end of each chapter. References at the end of the book facilitate self-remediation. Nurse-educators will also find this resource helpful for simulation experiences, classroom cases, group projects, and clinical conferences. Key Features: Reviews maternal-child nursing core content for course

separate self study guide. Beauty & Holistic Studies has been established since 2007 and in that time, has become one of the beauty industries leading providers in education resources. With subjects being added on a regular basis, it has helped over 30,000 students worldwide to gain success in their exams. Beauty & Holistic Studies was created by Kate Tierney, an experienced beauty and complementary tutor who understands the demands placed on today's busy students. As well as having jobs and families, students must attend a rigorous class schedule, one that includes intense practical and theory based subjects. With all of these demands, there is hardly any time left to follow a proper study program. With this in mind, these revision guides have been designed to provide students with the necessary knowledge and tools to pass their exams with ease. Students are able to practice the skills they have learned in college, all from the comfort of their own homes.

For over a decade, Dr. Carol Davis opened the minds of health care professionals worldwide to the idea of complementary therapies in rehabilitation. The pages of this renowned text covered evidence for efficacy in therapy, prevention, and wellness unlike any other text; it is the first of its kind published in the United States. As science continues to evolve and change, so does the expertise of Dr. Davis and the experienced therapists who join

together in writing the various chapters in the Third Edition of Complementary Therapies in Rehabilitation. This evidence-based text includes an insightful review profiling the latest peer reviewed research of holistic approaches commonly used in rehabilitation. Students and practitioners are now able to evaluate the efficacy of these approaches from the evidence that is reported. New to the Third Edition: - The latest summary of findings in energy medicine and bio-energetics applied to rehabilitation therapies - Updates on randomized control trials - Reviews of evidence of efficiency - Energy techniques as a way of returning healing to health care Professionals will also be excited to have at their hands a new chapter describing the latest discoveries in the science that helps explain how these therapies may “work.” It appears that the future of health care will be based on this unfolding science of energy, medicine and vibration. Professor Davis reads the most updated reports of the latest quantum science and then translates this information into meaningful ideas that relate to what therapists observe every day with patients in their case. Complementary Therapies in Rehabilitation, Third Edition, is the perfect text for all rehabilitation professionals looking to deepen their understanding of various holistic modalities that are making a difference in rehabilitation, especially with patients who have “hit the wall” with the standard treatments

"1200 Questions & Answers Interactive Testing Software" on CD-ROM by Michelle Phillips. The book represents a complete revision and reorganization of her classic two volume study guide set. It retains the questions from her previous publications and adds hundreds of new questions and answers. The book contains nearly 3000 questions and closely follows the content outline of the MBLEx, which is the primary exam used for state licensing. It is composed of multiple choice questions with answers and covers all of the content you will see on your exam. (We have retained the chapter on Asian/Eastern bodywork for those who may be taking the NCETMB or the New York state exam, so this study guide will prepare you for those exams as well.) The book is designed to assist you in determining your specific strengths and weaknesses in each subject area so that you can concentrate in the areas most needed. The process will make you increasingly more confident in your ability to successfully navigate your way through the exam to a successful conclusion. The interactive software package on CD-ROM has 1200 carefully selected questions and answers drawn from the 2-volume study guide set by Michelle Phillips. Easily installed on your computer, the software provides a realistic test taking experience similar to the MBLEx exam administered by the FSMTB, and the national certification examinations (NCETM and NCETMB)
