Is it possible to fully accept, even love, the life you have? Is it possible to drop the struggle to make yourself and your life different? Acclaimed teacher and bestselling author Roger Housden says yes in this profound alternative to nonstop striving and self-criticism. Whether about our relationships, careers, or spirituality, many of us judge ourselves as not measuring up. But fulfillment comes when we stop struggling and learn to trust the wisdom of what life presents us with. Housden wrote *Dropping the Struggle* as someone who, up until a few years ago, spent much of his time in a covert struggle with life. Despite his success, he often felt that something was missing. He struggled for years with an ongoing spiritual longing, with questions of meaning and purpose, with the search for love, with all the usual difficulties of being human, until he finally realized — though not with his thinking mind — that the only thing life was asking of him was to rest in a deeper knowing that was always there, usually silently, behind the arguments and strategies that would so commonly occupy his conscious self. "Struggle will never get us the things we want most," Housden writes, "love; meaning; presence; freedom from anxiety over the past and future; contentment with ourselves exactly as we are, imperfections and all; the acceptance of our mortality — because these things lie outside the ego's domain. For these, we need another way. That way begins and ends in surrender, in letting go of our resistance to life as it presents itself."

A career criminal with OCD tendencies and a savant-like genius for bringing order to his crime scenes, Martin considers himself one of the best in the business. Of course, he only takes items that will go unnoticed by the homeowners. Even though he hasn't This book is about partnership problems and the difficulties which come with commitment and marriage. It analyzes the origins of those problems, common and less common, and leads the reader along a path from understanding to the possibility of resolution. The author, an expert in the field, addresses the part played by sexual difficulties, which often arise in long-term relationships but receive little recognition in a society swamped with images of idealized sexuality. Indeed massive exposure to sexual ideals in the media produces an inevitable sense of comparative failure in many people. With divorce now so commonplace, marriage more than ever requires the "glue" of sexual satisfaction to heal conflict and keep love viable. The author's approach is to show how satisfaction in a partnership depends on understanding both the emotional intricacies of promising to share a life together, and the way these complex issues affect sexual responses - and vice versa. Dr Christie-Brown explores the way individuals bring unconscious demands and unrealistic expectations from the past into their partnerships; unless these are understood, conflict can result. A Tug of War model is used to illustrate the various conflicts that engaging with a partner can bring. The book is aimed at the open-minded reader who is prepared to look at their partnership problems in a new light; complex emotional issues are dealt with in an accessible way. It is also an essential tool for counselors, doctors, social workers and all those involved in psychotherapy; it combines - in a unique but tried and tested manner - analytical and behavioral disciplines to produce an effective remedy.--"Fully aware of the dimensions and dangers of the partnership and marriage minefield, this eminent and highly experienced therapist expertly elucidates the pleasures and excitements of a healthy and vigorous sexual life, and its contribution to our own personal well being and to the stability of our intimate relationships." Earl Hopper, Ph.D., Former President of the International Association of Group Psychotherapy--".a valuable addition to the literature in this somewhat neglected field. It will be of interest to GPs, gynaecologists and family planning doctors, particularly those with an interest in psychosexual medicine. It will also be of value to relationship counsellors..." The Obstetrician & Gynaecologist--"Offers an overview of the dimensions and dangers of the partnership and marriage 'minefield'. The author looks at love and the family, 'gender dialect', and fertility and infertility. She concludes with a detailed scheme (involving commitment, planning, and timing) for bringing about an improved sexual experience." Choice

Written by a biblical scholar and church elder, this ambitious and thought-provoking guide is designed to examine and explore beliefs that are prevalent in the evangelical Christian world today. New churches and denominations are emerging at a rapid pace, but are these congregations worshipping God in the way that He intended? Using Old and New Testament scripture, Dorricott traces the concept of God living among a people on the earth and shows how the Bible provides answers to fundamental questions such as: Why are there so many Christian churches? Can we be true Christians without belonging to a church? Is the apostles' teaching relevant in the twenty-first century? Is the New Testament just first-century history, or is it also a blueprint for us? Is all worship acceptable to God? By challenging all true followers of Jesus Christ to set aside conventional thinking and focus on the true meaning of God's house, Dorricott provides a path of genuine study and reflection that will guide all those who wish to examine and reaffirm their service in unity to God.

Toilets, trees and gender? Can there be a connection? Is there a gender angle to a business story? Is gender in politics only about how many women get elected to parliament? Is osteoporosis a women's disease? Why do more women die in natural disasters? These are not the questions journalists usually ask when they set out to do their jobs as reporters, sub-editors, photographers or editors. Yet, by not asking, are they missing out on something, perhaps half the story? This is the question this book, edited and written by journalists, for journalists and the lay public interested in media, raises. Through examples from the media, and from their own experience, the contributors explain the concept of gender-sensitive journalism and look at a series of subjects that journalists have to cover - sexual assault, environment, development, business, politics, health, disasters, conflict - and set out a simple way of integrating a gendered lens into day-to-day journalism. Written in a non-academic, accessible style, this book is possibly the first of its kind in India - one that attempts to inject a gender perspective into journalism. Published by Zubaan.

In the twentieth century, public sculpture has changed almost beyond recognition. Works inspired by classical and renaissance traditions--imposing equestrian monuments and triumphal arches--have been replaced by works such as Claes Oldenburg's *Clothespin* and Christo's *Running Fence*. This break from tradition has led to radically different approaches to public sculpture--but not without bitter controversy in the art community and the general public. *Contemporary Public Sculpture* offers the first comprehensive look at the development of contemporary public sculpture. Beginning with the revival of public sculpture in the 1960s, with the work of Picasso, Calder, Moore, Nevelson, and others, Senie traces the various developments that defined a new civic art which substituted the artist's fame for public content and sparked debates about cost, the role of government, and the place of public art in a democratic society. She shows how the growing irrelevance of traditional memorials resulted in new approach to the genre defined by Maya Lin's *Vietnam Veteran's Memorial*, which set out to heal a nation rather than glorify a military event by honoring victims rather than heroes; and how dissatisfaction with modern glass box architecture and its surrounding barren urban spaces led architectural firms like like Skidmore, Owings, & Merrill to use art to enliven both. Senie discusses how the earthworks of Robert Smithson and others inspired public sculpture that brought various landscape elements into urban sites; and she explores works by George Sugarman and Scott Burton that combine sculpture and furniture, changing the very idea of public art by creating a stage for public life. Finally, she examines the controversies that arise when citizens (including press and politicians) confront publicly funded work--such as Joel Shapiro's so-called *Headless Gumby* or Serra's *Tilted Arc*--that defies their sense of what public sculpture should be. Illustrated with over a hundred halftones, this overview of contemporary public sculpture provides a clear understanding of why it is there, why it looks the way it does, and what is really at stake in the continuing public art controversy.
